DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Kirk on 3/29/06.

The following changes to the drawings have been approved by the examiner and agreed upon by applicant: figure 3 of the Instant Application did not show the "flat" (18) extending horizontally. Mr. Kirk faxed a proposed replacement sheet for figure 3 (attached with this Office Action). The official copy of the replacement sheet per the agreed upon proposal drawing (changes) will be filed by the Applicant. In order to avoid abandonment of the application, applicant must make these above agreed upon drawing changes.

Allowable Subject Matter

Claims 1-26 are allowed.

Regarding claims 1, 13 and 25, VAN DE BOGART teaches a router for cutting material having a substantially cylindrical shaft member having a shank portion (3) and a cutting portion having cutting teeth. VAN DE BOGART also teaches a right hand (first helix) having cutting edges (1: first cutting edge) intersecting a left hand (second helix) having cutting edges (2: second cutting edge) ('949, figures 1 & 3 and Col. 1, lines 58-61).

It is noted that the "first cutting clearance" and "second cutting clearance" of the specification and claims 1, 13 and 25 are what one normally would call the "radial rake angle". Each of the teeth of VAN DE BOGART have one of either an upcutting or downcutting cutting edge having respective cutting clearances and non cutting clearances located circumferentially behind them. As seen from figures 1-3, each of these cutting edges also has a flat/margin located directly circumferentially behind the cutting edge. These teeth lack, and there is no suggestion to provide them with, second cutting clearance, second non-cutting clearance and corresponding flat.
